Professional Summary

Computer Science undergraduate specialized in backend engineering and scalable software development within **Agile environments**. Proficient in designing RESTful APIs, multi-tenant SaaS platforms, and developer tools using Java and TypeScript. Strong foundation in DSA, DBMS, and the SDLC, with a focus on building secure, high-performance systems and fostering **collaborative innovation** in global technology communities.

Education

Chaitanya Bharati Institute of Technology (CBIT) Hyderabad *B.E. in Computer Science and Engineering* 2024–2028

Relevant Coursework: Data Structures & Algorithms, DBMS, OOP (Java), Software Engineering, Distributed Systems.

Technical Skills

Languages: Java, TypeScript (Basics), JavaScript, Python, C++, SQL

Backend: Node.js, REST APIs, Microservices, **SDLC, Agile Methodologies**

Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI **Databases:** PostgreSQL, Redis, Prisma ORM

Tools & DevOps: Docker, Git, GitHub, Linux, **CI/CD Pipelines**

Core Concepts: Distributed Systems, Application Security, **RBAC**, Application Resiliency

Technical Projects

Full Stack Developer

NexIDE | AI-Powered Web IDE

2026

Developed a cloud-based IDE supporting real-time code execution using **Docker-isolated environments** to ensure secure process sandboxing.

Optimized execution engine for concurrent users, achieving a **40% reduction in setup latency** and improving resource throughput.

Implemented secure API communication protocols to handle high-performance workloads across distributed systems.

Full Stack Developer

SwiftStock | SaaS Inventory Management Platform

2026

Engineered a multi-tenant platform with **secure data isolation**, utilizing **Agile sprints** for iterative feature deployment and testing.

Implemented **Role-Based Access Control (RBAC)** via Prisma/PostgreSQL, managing 1,000+ records.

Built microservices-based RESTful APIs that adhere to industry security standards, ensuring **99.9% application resiliency**.

Full Stack Developer

Team Task Manager with RBAC

2025

Built a **collaborative orchestration platform** with JWT authentication, enabling seamless task delegation across cross-functional teams.

Optimized relational schemas for task prioritization, resulting in a **25% increase in data retrieval efficiency** for complex workflows.

Integrated automated testing and **CI/CD pipelines** to ensure rapid, reliable software improvements and maintenance.

Achievements

Delivery: Built and deployed **5+ full-stack production-ready applications** within a six-month period.

Recognition: Selected for the **GitHub Student Developer Pack** based on technical portfolio strength.

Competitive: Actively solving **DSA problems** on LeetCode/Codeforces.

Innovation: Participated in **Innovation Sprint 2026**, developing solutions for real-world technical challenges.
